RSS Feeds

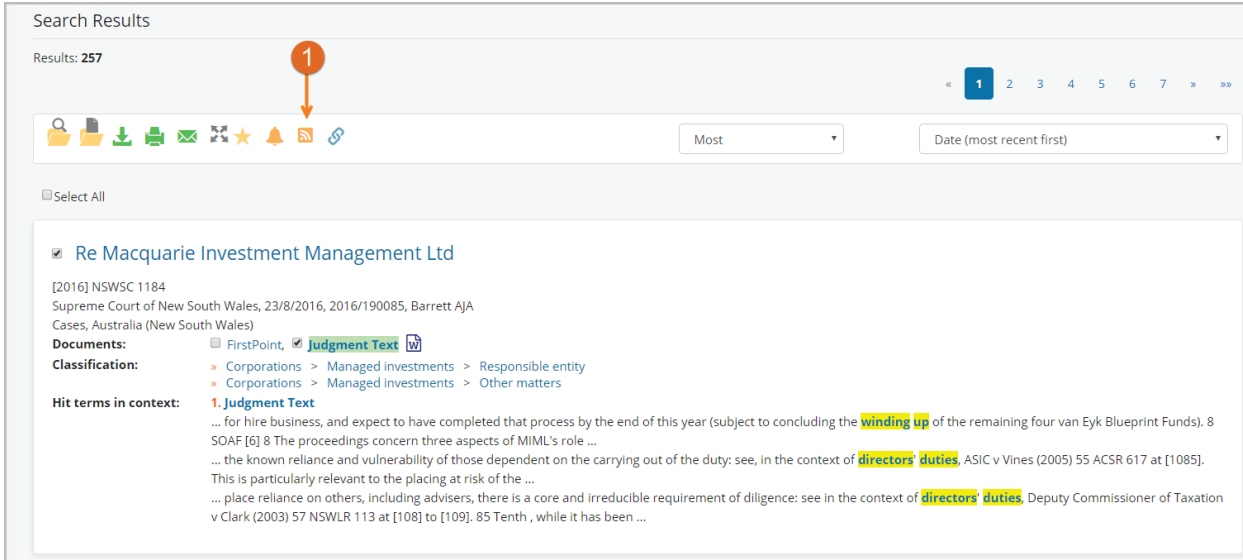

RSS (Really Simple Syndication) feeds allow you to view new online content, as soon as it's added, without having to log on to the service. With Westlaw AU you are able to create a feed from a Search and from selected content from the Table of Contents.

The  icon indicates that a News Feed is available. To create, view and manage News Feeds you first need to obtain news reader software or use browser software with built-in news reader software. Examples of these include Internet Explorer, FireFox and Safari. These browsers can be used to manage your RSS feeds in the same way that you manage bookmarks. In the example below the browser used is Internet Explorer.
